

NoteLocker 8

NoteLocker 8 is a convenient storage and charging solution with 8 individual compartments.

NoteLocker is a Danish designed storage and charging locker. As Europe's leading supplier of IT storage solutions for schools, this locker has proven its practicability at both Danish and foreign schools. The locker comes assembled and ready to use.

Each compartment has 2 power outlets and there is plenty of room for some of the various devices that students bring, for instance, laptops, Chromebooks, tablets, iPads and mobile phones.

NoteLocker comes with a twist grip handle as standard for attaching a padlock. There are also other locking options such as keys, manual combination locks and electronic keypads.

Both the design and high-security standard means NoteLocker is particularly suitable for schools and institutions. NoteLocker is a flexible solution adapted for educational institutions that want to give students individual storage and charging capabilities.

NoteLocker 8

SOLUTIONS

- Designed for storing and charging laptops, Chromebooks, tablets, iPads, mobile phones and other devices in 8 individual compartments.
- NoteLocker is powder coated and the surface is matte with a surface structure (texture) that hides minor damage and scratches. Therefore, the locker looks like new for longer.
- The base on NoteLocker has a cutout, so the locker can be placed against a wall without removing the floor panel.
- For added safety, if somebody were to topple NoteLocker, there are holes in the back for attaching it to the wall (screws/bolts included).
- The door is designed to fold back on itself if somebody runs into it when its open, to minimise any injuries to the person.
- A copper component is mounted on the locker to ensure a good electrical connection with the door, which is also fitted with a spring that ensures that the door is pressed against the copper component.

DEVICES

Laptops, Chromebooks, tablets, iPads, mobile phones and other devices

The compartment height is 11 cm (see further compartment dimensions on page 3).

OPTIONAL PURCHASES

- Coloured doors
- Electronic keypads
- Manuel combination locks
- Key locks
- Sloping top (easier cleaning)

ITEM NUMBER

NoteLocker 8
Item no. NO3-NL-8M8D-SC

1. Storing and charging devices in 8 individual compartments.

2. Each compartment is fitted with 2 power outlets.

3. The locker is fitted with a handle for a padlock as standard.

4. The door is made of non-corrosive steel and designed to fold back on itself. There is a copper component mounted and a spring function.
