

NoteCart Flex Extended 24

USB-C

NoteCart Flex 24 is a mobile storage and charging solution for 24 devices.

NoteCart Flex is a mobile, compact cabinet for storage and charging of iPads, tablets, laptops, Chromebooks and similar devices. The 4 wheels on the NoteCart Flex series have been carefully selected to complement the rest of the design so that NoteCart rolls easily, regardless of weight of the many devices and the type of floor under the mobile cabinet. Wheels with ball bearings and soft rubber coating which, in use, maintain and restores the rounding of the wheel.

During operation, all electronics are stored in the locked compartment behind the cabinet, so that only the IT manager has access to them. A secure cable management system ensures that the cables stay in the cabinet once they have been installed.

The main panel divides power connectors into groups of USB-C chargers. This is to ensure unnecessary overloading when connected to the main switch.

NoteCart Flex Extended 24 Solutions

•Designed for storage, charging and transport of up to 24 laptops (15,6"), Chromebooks, tablets, iPads or similar devices.

•The charging electronics in the NoteCart ensure intelligent charging of the batteries. The charging electronics support PD standard in USB charging. The charger communicates with the devices and protects them from overcharging which optimize battery life. For example, charging stops when the devices' batteries are fully charged.

•The cabinet is sturdy and easy to transport on its rubber wheels, which have been thoroughly tested. The NoteCart has 4 wheels, 2 have brakes.

•Strong handles on the sides make it easy to push and move the cabinet.

•The cabinet has a cable holder system which ensures that the cables do not disappear and that they are stored clutter-free.

•The locks on the front and rear doors ensure that the devices are stored safely.
